

Environment and climate issues

The discussion on environmental issues and corporate social responsibility is becoming increasingly prominent and affecting all businesses and societies. Farice's core business is to provide international data connectivity between countries, Farice role is thus in essence to provide carbon neutral of personal interaction.

Farice' objectives on climate issues and waste

Farice wishes to contribute to minimising any human impact on its environment by setting climate goals and following up these goals with targeted action.

Farice policy is to use environmentally friendly solutions for its operations when feasible. Farice minimises its impact on the environment with targeted environmental management.

The environmental impact of operations is monitored and action is taken, if necessary. Farice is committed to supporting society with regard to environmental matters.

First step is to measure Farice carbon footprint as is and then put in motion a strategy to reduce the footprint.
